Skills Assignment 2: Use Case

Use Case Story

User wants to take a quiz

Assumption

User has the browser installed and updated.

User is familiar with button interactions and reloading a page.

Steps

1. User loads page
2. User reads question and options
3. User clicks button of choice
4. User results are displayed
5. User clicks reload page and repeats

Variable Interactions

User does not click button > result does not display
